

I have heard that my radio station K-Love may be switched over to a low power FM service, which will inhibit me from tuning in to the station's broadcast. I am very upset to hear this and am asking that this not happen. It's great to be able to tune to a radio station that's not perverse like so many others. I can't believe what you are allowing to be said over the airwaves these days. The local radio station (G105 in Raleigh, NC) should be shutdown for all its profanity! K-Love is a great station and I never hear anything offensive like the other stations.

There are many of us in our community who listen to this station and enjoy it immensely. Please don't take away one of the only decent stations left.
